

# FARM OFFERINGS

## Pastured Poultry:

Chickens are raised in movable pens in the pasture. They are moved to fresh pastured daily and fed a ration of non-GMO feed. Chickens are processed at an inspected facility.

## Grass Fed Beef:

Cattle are managed through rotational grazing. They are grass fed and grass finished. Never treated with hormones or antibiotics. Processed at local butcher and sold in wholes, halves, and quarters.

## Pastured Eggs:

Chickens are rotated through the pastured multiple times per week. Fed a diet of fresh pasture and non-GMO feed. Our chickens are outside and on grass all day, everyday.
